

Electrical

Front / Side of barn					
1a	Bob Manor				
1	Bob Viaene				** When you are backing into your Electrical spot, please make sure your electrical box is in the middle of your trailer. EXCEPT, If you are on the ends. Please park as far over as you can possibly get so all the trailers can get lined up with their electrical boxes. We are completely full and we have to get ALL the trailers parked in their correct spots to make this work. **If you need help backing please come ask for Help. Shawn is more than happy to help you. If you are not parked correctly you will be asked to move. Thank You!
